SUMMARY

Computer Science Engineering graduate with hands-on experience in software development, backend engineering, and data engineering projects. Strong foundation in Java, Python, C++, Data Structures & Algorithms, SQL, and web development. Experienced in building full-stack applications, designing databases, developing RESTful services, and using Git for version control. Passionate about writing clean, efficient code and solving real-world software problems.

EDUCATION

Chandigarh University, Mohali, Punjab

Bachelor of Engineering (Computer Science & Engineering)

(2022-2026)

PROJECTS

NEXA Programming Language & Compiler | C++ • LLVM • CMake • Git

- Built a custom programming language and compiler from scratch.
- Developed a handwritten lexer, recursive-descent parser, Abstract Syntax Tree (AST), and semantic analysis.
- Generated LLVM Intermediate Representation (IR) and compiled programs into native Linux executables.
- Used Git for version control and modular software development.
- Technologies: C++, LLVM, CMake, Git

Weekly Amazon Bestseller Analytics Dashboard | Python • PostgreSQL • SQL

- Developed an automated data pipeline to track Amazon India bestselling books and store weekly historical snapshots.
- Designed a PostgreSQL database for efficient historical data storage and trend analysis.
- Built an interactive analytics dashboard for visualizing bestseller rankings over time.
